SAFETY INSTRUCTIONS

WARNING

Do not open the equipment unless totally familiar with electrical circuits and service manual.

ELECTRICAL SHOCK HAZARD

Only qualified personnel should work inside the equipment.

Do not approach the radome closer than 0.5 m when it is transmitting.

Microwave radiation can cause severe injury or illness. Radiation level: 10 W/m² at 0.5 m

Turn off the power at the mains switchboard before beginning the installation. Post a sign near the switch to indicate it should not be turned on while the equipment is being installed.

Fire, electrical shock or serious injury can result if the power is left on or is applied while the equipment is being installed.

CAUTION

Confirm that the power supply voltage is compatible with the voltage rating of the equipment.

Connection to the wrong power supply can cause fire or equipment damage. The voltage rating appears on the label at the rear of the terminal unit.

Use the correct fuse.

Use of wrong fuse can result in damage to the equipment.

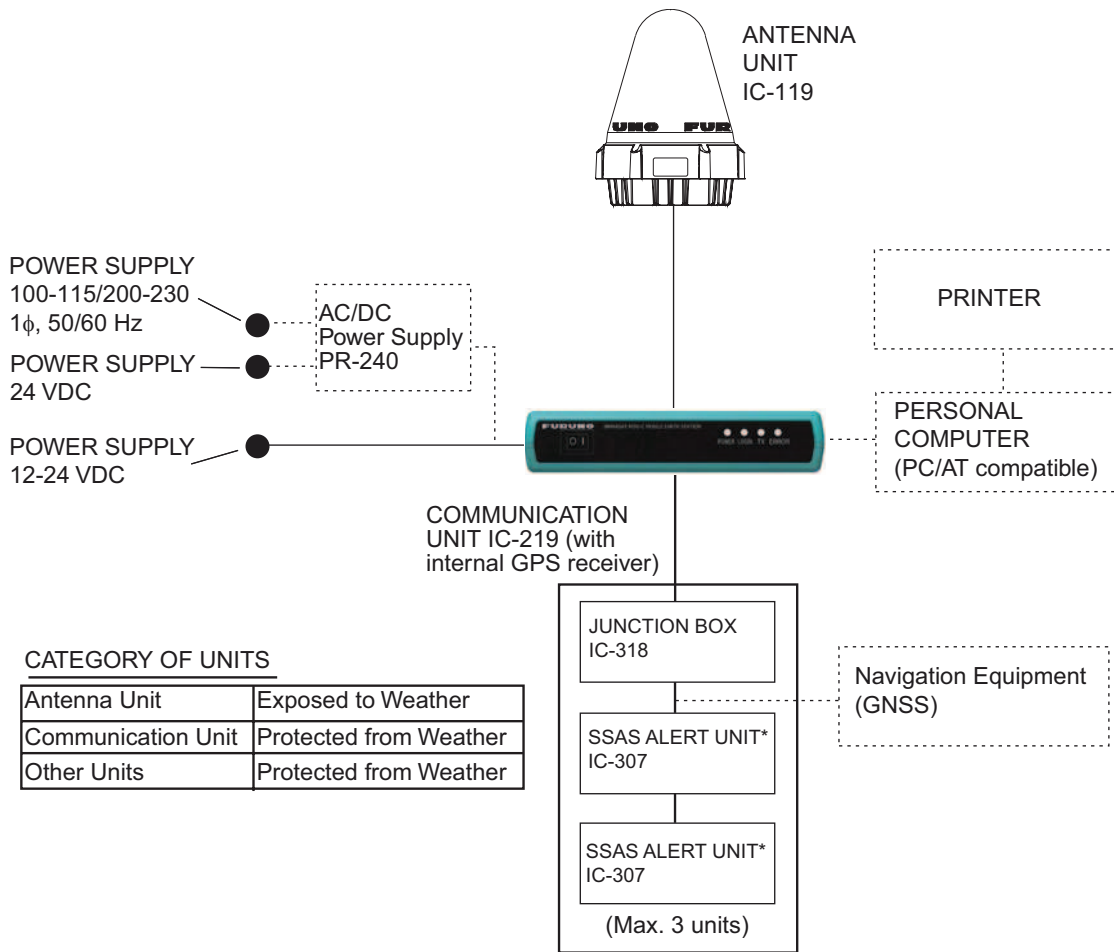

Keep the following compass safe distances.

	Standard	Steering
Antenna Unit IC-119	0.30 m	0.30 m
Communication Unit IC-219	0.30 m	0.30 m
AC/DC Power Supply Unit PR-240	0.90 m	0.60 m
Junction Box IC-318	0.90 m	0.60 m
SSAS Alert Unit IC-307	0.70 m	0.45 m

Ground the equipment to prevent electrical shock and mutual interface.

SYSTEM CONFIGURATION

CATEGORY OF UNITS

Antenna Unit	Exposed to Weather
Communication Unit	Protected from Weather
Other Units	Protected from Weather

*: At least two SSAS Alert Units are required.

EQUIPMENT LISTS

Standard supply

Name	Type	Code No.	Qty	Remarks
Antenna Unit	IC-119	-	1	
Communication Unit	IC-219	-	1	
Junction Box	IC-318	-	1	For SSAS only.
SSAS Alert Unit	IC-307	-	2	For SSAS only.
Installation Materials	CP16-02100	000-043-411	1	For Antenna Unit
	CP16-05301	001-179-990	1	For Communication unit
	CP16-05101	001-180-020	1	For Junction Box, SSAS only
Spare Parts	SP16-01401	004-439-530	1	For Communication unit, fuses
Accessories	FP16-02700	000-021-675	1	For Communication unit, CD-R

Optional supply

Name	Type	Code No.	Qty	Remarks

	CP16-03670	000-043-652		w/o pipe, 100 m
	CP16-05030	000-016-924		w/o pipe, 30 m, for armored cable

This page is intentionally left blank.

1. MOUNTING

NOTICE

Do not apply paint, anti-corrosive sealant or contact spray to coating or plastic parts of the equipment.

Those items contain organic solvents that can damage coating and plastic parts, especially plastic connectors.

1.1 Antenna Unit

1.1.1 Mounting location

Refer to IMO resolutions A663(16) and A.807(19), as amended.

- There should be no interfering object within the line-of sight to the satellite. Objects within line-of sight to a satellite, for example, a mast may block transmission/reception. Mount the antenna unit as high as possible. This keeps it free of interfering objects and water spray. The location should be well away from a GPS antenna. A GPS receiver may be interfered by the Inmarsat C wave.
- If Inmarsat ship earth stations other than C are installed, separate the Inmarsat antenna at least 8 m.
- Separate the antenna unit from an S-band radar as follows:

- The allowable vibration level as specified by Inmarsat is as shown in the table below.

Allowable vibration level

Frequency	Level
2 to 10 Hz	2.54 mm Peak Amplitude
10 to 100 Hz	9.8 m/s ² Peak Acceleration

1. MOUNTING

- Avoid the location near tunnels and stacks; smoke and soot on the radome can lower signal level (leave 10 m or more in horizontal distance).
- Separate the antenna unit 5 m from HF, VHF or 27 MHz antenna.

1.1.2 Mounting

The antenna cable is available in lengths of 30 m, 50 m and 100 m (see table below).

Cable length	Type	Remarks
30 m (no armor)	TP5FBAW-5DFB	TNC connector at both ends
30 m (w/armor)	5D-FB-CV-NP	N connector on one end (antenna side)
50 m (w/armor)	8D-FB-CV	
100 m (w/armor)	12D-SFA-CV	

To mount the antenna unit, a dedicated mounting pipe is necessary.

For how to mount the antenna, see the outline drawing at the end of this manual and "Installation and Replacement of Antenna Unit", **included with the antenna unit**.

1.2 Communication Unit

Select the following place to install the communication unit.

- The temperature and humidity should be moderate and stable.
- For maintenance and checking purposes, leave sufficient space at the sides and rear of the unit and leave slack in cables.

Mounting

Use two self-tapping screws (4x40, supplied) to fix the communication unit. The unit can be mounted on a bulkhead, a tabletop or on the underside of table. Use the fixing holes at the top for bulkhead mounting, or the fixing holes at the bottom for tabletop mounting or underside of a table.

After mounting the unit, cover the screw heads with the cosmetic caps (2 pcs, supplied) to fixing hole to cover the screw head. Note that the rear panel should be downward when the communication unit is mounted on the bulkhead.

How to connect the LAN cable

Use two binding screws (pre-attached) and the LAN cover to connect the LAN cable to the communication unit. Use the cable tie (supplied) to fix the cable.

Fix the cable here with a cable tie.

1.3 Junction Box IC-318

The junction box IC-318 is connected to the communication unit by using the cable assy 16S0344 (2 m, attached to the junction box). Install the junction box within 2 m from the communication unit.

1. Remove four screws from the unit to separate the bottom chassis from the top chassis.
2. Fix the bottom chassis to the mounting location with four self-tapping screws (4x16, supplied).
3. Connect the cables referring to Chapter 2.

Junction box IC-318

1. MOUNTING

1.4 AC/DC Power Supply Unit PR-240 (option)

Fix the unit on a table with four self-tapping screws.

AC/DC power supply unit

2. WIRING

Wiring of FELCOM19

2.1 Antenna Cable Connector at the Communication Unit

5D-FB-CV-NP (30 m)

Remove the outer sheath, armor and inner-sheath by the dimensions shown.

Cover with heat-shrink tubing and heat.

Set the nut, washer, gasket, clamp onto cable as shown.

- Be careful not to damage the braided shield.

Fold back the braided shield onto the clamp and trim the shield as shown.

Make the length of insulator 3.5 mm and the length of the core 5 mm.

- Be careful not to damage the core.

Set the center pin to the core and solder the pin from the hole in the pin.

(Pull the pin with approx. 1 kg of force to check strength of solder joint.)

- Be sure the solder is flush with surface of pin.

- Be sure there is no gap between center pin and insulator. Do not push the center pin into the insulator.

- Do the soldering as quickly as possible so as not to deform the insulator.

Set the ring and insulator ring onto the cable.

Set the shell to the cable then turn the nut to tighten. (Do not tighten by turning shell.) - Use a wrench or the like to tighten the nut securely.

How to fabricate antenna cable 5D-FB-CV-NP

8D-FB-CV (50 m)

Remove outer sheath and armor by the dimensions shown left.
Expose inner sheath and shield by the dimensions shown left.

Remove insulator and core by 10 mm.

Twist shield end.

Slip on clamp nut, gasket and clamp as shown left.

Fold back shield over clamp and trim.

Cut aluminum foil at four places, 90° from one another.

Fold back aluminum tape foil onto shield and trim.

Expose the insulator by 1 mm.

Expose the insulator by 5 mm.

Slip the pin onto the conductor. Solder them together through the hole on the pin.

Insert the pin into the shell. Screw the clamp nut into the shell.
(Tighten by turning the clamp nut. Do not tighten by turning the shell.)

How to fabricate antenna cable 8D-FB-CV

2. WIRING

12D-SFA-CV (100 m)

Remove outer sheath and armor by the dimensions shown left.
Expose inner sheath and shield by the dimensions shown left.

Twist shield end.

Slip on clamp nut, gasket and clamp as shown left.

Slip the pin onto the conductor. Solder them together through the hole on the pin.

Insert the pin into the shell. Screw the clamp nut into the shell.
(Tighten by turning the clamp nut. Do not tighten by turning the shell.)

How to fabricate antenna cable 12D-SFA-CV

2.2 Junction Box IC-318

Use the junction box IC-318 to connect the distress alert/received call unit IC-305 and other units (max. four units) to the communication unit. Unfasten four screws to remove the units cover to connect cables.

For connection, use the optional 5 pair cable CO-SPEVV-SB-C 0.2x5P, JIS cable (Japan Industrial Standard) TTYCS-4(LA) or equivalent.

Input/output sentences

The following sentences can be input/output with the navigator connected.

Input sentences

BWC, BWR, DBT, DTM, GGA, GLL, GNS, GSA, MTW, RMA, RMB, RMC, VDO, VDR, VTG, WPL, ZDA

2. WIRING

This page is intentionally left blank.

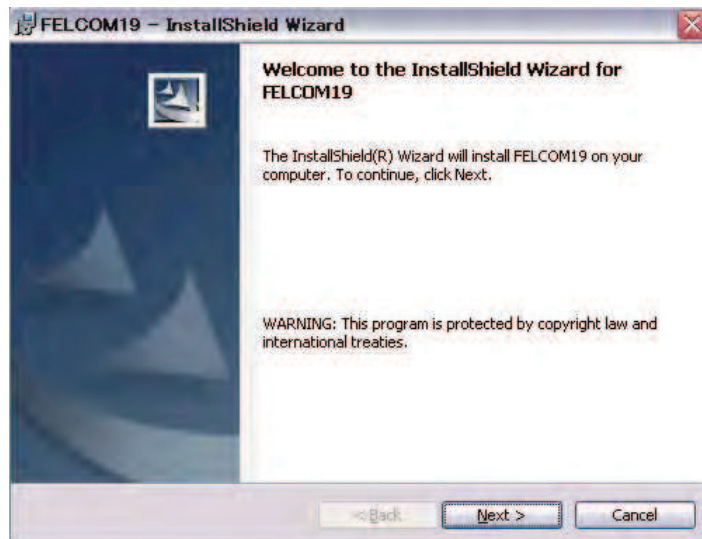

3. INITIAL SETTINGS

This chapter shows you how to setup the equipment. Some procedures require entry of job no. and password. Ask your dealer.

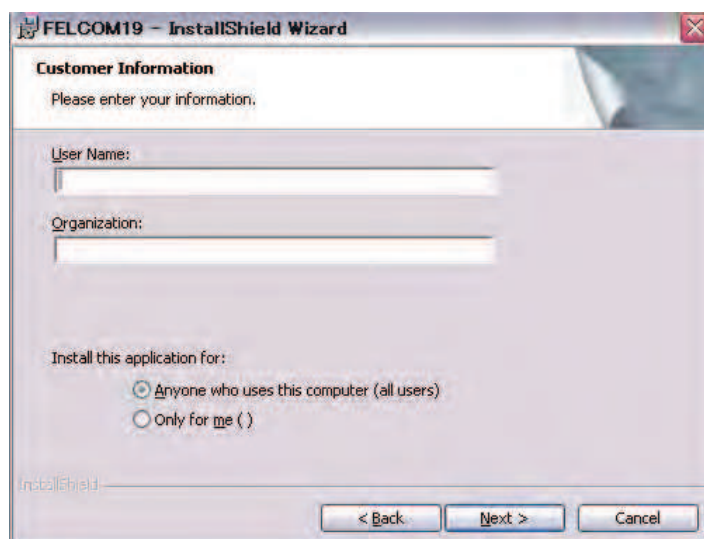

3.1 How to Install Software

After installing the equipment, install the FELCOM19 software (F19PC) in the PC as follows:

1. Turn on the PC.
2. Set the CD-ROM in CD drive.
3. Click the icon of "SETUP.EXE" in the CD-ROM. The setup procedure begins, showing the welcome dialog box.

4. Click the **Next** button.

3. INITIAL SETTINGS

5. Enter your name and organization.

6. Click the **Next** button.

7. Click the **Install** button and the installation begins. When the installation is completed, the FELCOM19 dialog box appears.

- Click the **Next** button.

- Click the **Finish** button. The FELCOM 19 PC application shortcut is created on the desktop.

Note: To uninstall the F19 application from the PC, see the operator's manual.

3.2 How to Set the IMN (INMARSAT MOBILE NO.)

Set your IMN (Inmarsat Mobile No.) using the PC as below.

- Power on the communication unit and PC in order.
- Double click [F19PC] on the screen to start the program.
- Press the function key **F8** to show the [Setup] menu.

- Press **2** key to display the [System Setup] menu.

3. INITIAL SETTINGS

5. Confirm that the [IMN] is selected, and then press the **Enter** key.
An input box appears.
6. Key in your IMN.
7. Press the **Enter** key.
8. Press the **Esc** key to erase the input box.
9. Press the **Enter** key.

To clear the IMN, select IMN, then press **I, M, N** while pressing the **Alt** key. When using the FELCOM19 for VMS (Vessel Monitoring System), DNID (Data Network ID) has to be downloaded via the LES (Land Earth Station). This arrangement is normally done by authority of VMS.

3.3 How to Select Position-fixing Equipment

Select the position-fixing equipment that is to feed navigation data to the FELCOM.

1. Press the **F8** and **1** keys to show the [System Setup] menu.
2. Select [Nav Port] then press the **Enter** key.
3. Select the navigator connected to the FELCOM then press the **Enter** key.
OFF: No navigator connected.
Auto: If two or more navigators are connected, the FELCOM automatically selects the position sensor in the order of GPS and Loran C.
INT: Use the navigator that is built into the communication unit.
EXT: Use an external navigator.
4. Press the **Esc** key several times to close the menu.

3.4 PC Window Setup

The [Terminal Setup] menu provides for set up of the PC window. The set up includes selection of date display format, screen saver and window colors.

1. Press the **F8** and **3** keys to show the [Terminal Setup] menu.

Terminal Setup	
Connection	
Detail	Terminal Network Information
	Eth0 172.31.16.100 /24
Date Disp. Form	YY-MM-DD
Screen Saver	OFF
Window Color	

2. Select [Detail] then press the **Enter** key to show the [Network Adapter List].

Network Adapter List	
Name	IP Address
*Eth0	172.31.16.100/24
Eth1	192.168.16.11/24
Eth2	-----/--
Eth3	-----/--
Eth4	-----/--

Note: The [Network Adapter List] shows the name of the LAN interface and the IP address of the PC (terminals installed for the FELCOM system). The LAN interfaces have names to distinguish them from one another. The asterisk marks the LAN interface currently selected for communication.

3. Select the LAN interface to use for communication then press the **Enter** key.
4. Select [Connection] then press the **Enter** key to show the [Connection List]. This list shows the names of the terminals that can be connected to the LAN interface.

Connection List				
No.	Name	IMN	IP Address	Software Version
*01	F19_123456	123432588	172.31.16.100/24	1650248-01
02	F19_133234	456789210	192.168.16.11/24	1650248-01
03				
04				
05				
06				
07				
08				
09				
10				

Note: The No., Name, IMN, IP address/subnet mask and software version of each terminal are shown. The asterisk marks the terminal currently selected for communication.

5. Select the terminal to use then press the **Enter** key.
6. Select [Date Disp. Form] then press the **Enter** key to open its options window.
7. Select [YY-MM-DD], [MMM-DD-YY] or [DD-MMM-YY] as appropriate then press the **Enter** key.
8. Select [Screen Saver] then press the **Enter** key.
9. Turn the screensaver ON or OFF as appropriate then press the **Enter** key. When enabled, the screensaver automatically starts 10 minutes after there is no key operation. To release the screensaver, press any key.

3. INITIAL SETTINGS

10. Select [Window Color] then press the **Enter** key.

```
-----Window Color-----
Select Preset 1 2 3
Load Default
-----
Edit Color
Window      [ Base Window      ]
Fore Color  [ L-WHITE          ]
Back Color  [ BLUE                ]
-----
To Change: ENTER  To Change Value:L<=>R
```

11. Set the window colors as follows:

- 1) [Select Preset] provides three preconfigured window color sets. Use one of these sets, or continue this procedure to customize window colors.
- 2) Select [Window]. Use ← or → key to select the window for which to select color.

Base Window: Standby display

RCV Message Display: Receive message display

EGC Message Display: EGC message display

EDIT1 - EDIT2: Editor screens 1 and 2

Function: Menu

Sub Menu 1 - Sub Menu 4: Sub menus 1-4

Message: Status message

Preset No.	Window	Fore Color	Back Color

	Sub Menu 4	WHITE	BLACK
	Message	WHITE	BLUE

3. INITIAL SETTINGS

- 3) Select [Fore Color].
 - 4) Use ← or → key to select a color.
 - 5) Select [Back Color].
 - 6) Use ← or → key to select a color.
 - 7) To select colors for other windows repeat steps 2)-6).
 12. Press the **Enter** key to show the [Update] window.
 13. [Yes] is selected; press the **Enter** key.
 14. Press the **Esc** key several times to return to the standby display.
- To restore all default color settings, select [Window Color] from the [Terminal Setup] menu, select [Load Default], press the **Enter** key then press the **Enter** key again.

4. HOW TO INSTALL OPTIONAL EQUIPMENT

The optional waterproofing kits OP16-58 and OP16-61 are used to protect the connectors on the communication unit from water splash. Note that these optional kits should be used as a couple.

4.1 IPX2 Kit OP16-58 (cables)/Waterproofing Kit OP16-60 (for IC-318)

OP16-58

Connect the waterproofed D-sub cables to the rear of the communication unit, instead of the standard supply cable.

OP16-58 (Code No.: 001-180-070)

Name	Type	Code No.	Qty	Remarks
Cable Assy.	H230817-1	001-176-552-10	1	Not used.
	H230817-2	000-176-553-10	1	Not used.
	XM-FD-361	000-176-551-10	1	For connection with IC-318

OP16-60

To mount the IC-318 on a bulkhead, use the waterproofing kit to keep water splash out of the unit. When the OP16-58 is used, replace the cable from the IC-318 with the XM-FD-361 as shown on next page.

OP16-60 (Code No.: 001-180-090)

Name	Type	Code No.	Qty
Cover gasket	16-023-5502	100-373-530-10	1
Grommet	16-023-5503	100-373-540-10	1

4. HOW TO INSTALL OPTIONAL EQUIPMENT

#	Color
1	Blue
2	Brown
3	Purple
4	Gray
5	-
6	Green
7	Yellow
8	Orange
9	Pink
10	Light-green
11	White (w/black dots)
12	White (w/red dots)
13	Black
14	Red
15	Light-blue

4.2 Waterproofing Kit OP16-61 (for IC-219)

Note: When the communication unit is mounted on a bulkhead, the rear panel (the side with connectors) should be downward for waterproofing.

OP16-61 (Code No.: 001-180-110)

Name	Type	Code No.	Qty
Binding Screw	#4-4OUNCX3/16	000-176-619-10	2
Dsub Cover	16-023-4532	100-373-520-10	1
D-sub Gasket	16-023-4513	100-368-120-10	1
LAN Packing 2	16-023-4512	100-368-110-10	1
LAN Waterproof Plate	16-023-4531	100-368-180-10	1

Cables connected

1. Unfasten two binding screws to detach the LAN cover from the communication unit.
2. Peel the paper and attach the LAN packing 2 (supplied with OP16-61) to the communication unit.
3. Re-attach the LAN cover.

Peel the paper and attach the D-sub gasket (supplied with OP16-61) to the communication unit. Then, connect the waterproofing cable XM-FD-361 (supplied with OP16-58) to connect with the IC-318.

No cables connected

Use two binding screws (pre-attached) to fasten the LAN waterproof plate (supplied with OP16-61).

Peel the paper and attach the D-sub gasket (supplied with OP16-61) to the communication unit. Then, fasten two binding screws (#4-4OUNCX3/16, supplied with OP16-61) to fix the Dsub cover (supplied with OP16-61).

4.3 Waterproofing Kit OP16-68 (for IC-307)

Note: This kit cannot be used if the IC-307 is mounted face upward.

OP16-68 (Code No.: 001-189-400)

Name	Type	Code No.	Qty
Water proofing Cover	16-023-5501	100-374-950-10	1
Fixing Tape	24-009-1225	100-368-200-10	2

1. Unfasten four screws to remove the cover of IC-307.
2. Attach supplied fixing tape to the underside of the cover as shown in the illustration below.

3. Attach the cover.
4. Remove the paper from the waterproofing cover and attach the cover as shown in the illustration below.

5. HOW TO CHANGE POWER SUPPLY SPECIFICATIONS

The AC-DC power supply PR-240 is shipped ready for connection to a 200-230 VAC ship's mains. If the ship's mains is 100 VAC, change the tap connection and terminal board connection as below. Attach a label supplied as accessories to the front panel according to the ship's mains.

Ship's mains	Tap connection	Terminal board	Label
200 to 230 VAC	SEL 230 V	Below (a)	200-230 VAC, 2.2-1.7 A, 1 ϕ 50/60 Hz
100 to 115 VAC	SEL 115 V	Below (b)	100-115 VAC, 3.2-2.6 A, 1 ϕ 50/60 Hz

Note: The DC output load must be less than 8 A.

APPENDIX 1 JIS CABLE GUIDE

Cables listed in the manual are usually shown as Japanese Industrial Standard (JIS). Use the following guide to locate an equivalent cable locally.

JIS cable names may have up to 6 alphabetical characters, followed by a dash and a numerical value (example: DPYC-2.5). For core types D and T, the numerical designation indicates the *cross-sectional Area (mm²)* of the core wire(s) in the cable. For core types M and TT, the numerical designation indicates the *number of core wires* in the cable.

1. Core Type

D Double core power line

T Triple core power line

M 1 mm Multi core

TT 0.75mm twisted pair communications (1Q=quad cable)

2. Insulation Type

P Ethylene Propylene

Y Vinyl

3. Sheath Type

Y Vinyl

4. Armor Type

C Steel

5. Shielding Type

Y Corrosive Resistant

6. Core Sheath

S All cores in one sheath

-S Individually sheathed cores

SLA All cores in one sheath, plastic tube sheath w/aluminum tape

-SLA Individually sheathed cores, plastic tube sheath w/aluminum tape

DPYC

手順

- 1) アンテナ固定金具をホースクランプでマストに仮固定する。
対応マスト径: 40A (φ48.6) ~100A (φ114.3)
58-75: 40A (φ48.6)
87-112: 65A (φ76.3) ~80A (φ89.1)
104-138: 90A (φ101.6) ~100A (φ114.3)
- 2) ロックナットをアンテナ固定金具のパイプネジ部にねじ込む。
- 3) アンテナ固定金具のネジ部にシール剤を塗布する。
- 4) アンテナベースをねじ込み、ロックナットで固定する。
- 5) アンテナ固定金具、アンテナベースに下からケーブルを通す。
- 6) イラックススリーブをケーブルに通して、コネクタプラグをアンテナ上部のコネクタに接続する。
- 7) イラックススリーブを熱で固着し、ビニルテープで固定する。
- 8) アンテナベースをアンテナ上部にネジ3本で固定する。
- 9) アンテナ全体をマストに本固定する。
- 10) ケーブルをマストに固定し、アース線 (工材) を布設する。
ケーブル、アース線は耐候性コンボックスで固定する。
- 11) *部分をシール剤で完全に覆う。

PROCEDURE

1. FIX THE ANTENNA BRACKET TO MAST TEMPORALLY.
MAST DIAMETER: 40A (φ48.6) ~100A (φ114.3)
58-75: 40A (φ48.6)
87-112: 65A (φ76.3) ~80A (φ89.1)
104-138: 90A (φ101.6) ~100A (φ114.3)
2. SCREW A LOCK NUT TO THE PIPE OF ANTENNA BRACKET.
3. APPLY SILICONE SEALANT TO SCREW OF THE BRACKET.
4. SCREW THE ANTENNA BASE AND FIX IT WITH THE LOCK NUT.
5. PASS THE CABLE THRU THE PIPE AND ANTENNA BASE FROM BOTTOM.
6. CONNECT THE CABLE PLUG TO THE CONNECTOR ON UPPER UNIT THRU SHRINK TUBE.
7. FIX THE SHRINK TUBE WITH HEAT AND BIND WITH VINYL TAPE.
8. FIX THE BASE UNIT TO UPPER ANTENNA WITH 3 SCREWS.
9. FIX THE ANTENNA UNIT TO MAST SECURELY.
10. FIX THE ANTENNA CABLE AND GROUND WIRE TO MAST.
11. SECURE THEM WITH WEATHERPROOF CABLE TIE.
COVER SCREW HEADS MARKED '*' WITH SILICONE SEALANT.

金属製クランプで巻くときは、ケーブルを傷つけないように保護すること
WHEN USE A STEEL CLAMP TO BIND THE CABLE,
PROTECT THE CABLE TO AVOID INJURY

注記

パイプ内を通してコネクタ付ケーブルを直接接続するときは、アンテナベースを通す前に、固定金具パイプを通すこと。

NOTE

PASS THE CABLE WITH PLUG THRU THE ANTENNA BRACKET PIPE BEFORE THE ANTENNA BASE WHEN THE CABLE WITH PLUG IS CONNECTED TO ANTENNA UNIT DIRECTLY.
